FREE! REPORT '47 Underground Traffic Generating Methods' Which Can Cause A Dramatic Boost of Laser Targeted Visitors To Any Of Your Websites...

47 Underground Traffic Generating Methods

Did You Enjoy This Report ?...Then Please Download My Other 9 Reports by [Clicking Here](#)

Please Distribute This Report To Your Website visitors 'or' to your Email list

Hello, and welcome to my ebook. I am a Traffic generating expert and have been addicted to generating a variety of traffic for over 8 years now.

I love what I do and love to help others succeed in their traffic generating efforts, which is one of the reasons I created this report.

In this report, I reveal some of my favourite traffic strategies, and although they are simple, I have found that simple ideas tend to work the best. You can definitely use these methods right away.

These traffic generating tricks and tactics are some of the most powerful strategies I have used, and so many people know about them, yet very few put them to use. Please do put them into Action!

Below you'll find 47, infact I have given away 5 Free tips, so there are infact 52 Tips in total. Make use of them

Hey, feel free to distribute this publication by to your website visitors (or blog visitors), as a bonus to your list, as an opt-in bonus, or even as a free download at your site or blog. It may not be sold for profit!

Here are the terms of this report:

[YES] Can be Passed on to your website visitors, email subscribers

[YES] Can be packaged with other paid products

[YES] Can be offered as a bonus with other paid products

[NO] Can be edited and put your name on it

[NO] Can be edited or revised

[YES] Can be given away

[YES] Can sell Resale Rights

[YES] Can sell Master Resale Rights

[YES] Can sell Master Distribution Rights

[NO] Can sell Private Label Rights

[YES] Can be added to PLR membership sites

[YES] Can be offered through auction sites

Ok, now Lets get started...

47 Traffic Generating Tips

5 Ezine article tips (Tips 1-5)

Learn 5 'common' but popular ways increase your EZA article view.. (you must use at least 3 of these, or your articles will just be buried to the bottom of the Eza searches)

TIP 1 Eza tip 1: Make a killer heading

Make a killer title heading! Yes, as simple and obvious as it seems this can increase how many readers will read your article. You have to remember your article is being listed with other articles in the same niche, it is a battle, and if your article title is boring, dull etc, then it wont get much attention. Infact the reader will click on the better more interesting sounding article, so the title of your article has an important part to play in how many people actually click your article ready to view it!

TIP 2 Eza tip 2: Submit more than 1 article a day

I have found that submitting articles in bulk of 5 at a time can have a bit of a boost in your article view rate, compared to submitting 1 a day for 5 days continuously. You should aim to submit 5 a day, then 5 the next day, etc.

I have tested submitting In bulk, compared to 1 a day, and submitting in bulk not only increased article views but also profile views. Make sure you include an interesting sounding description on your profile aswell.

TIP 3 Eza tip 3: Try some link building to your articles

Try some SEO Link building to your article Urls. For example if your article URL is

www.ezinearticles.com/my-article-on-my-niche.htm

then get some backlinks to this article from directories, blogs(of a similar nature to the article niche), 1 way links, forum links and other important links towards this article. This will give some well needed link juice to that article and can boost its rankings in the search endings. Tip – makes sure you used the keyword that the article is about in the keyword your article is about. Don't use the anchor text 'Healthy Dog food' for an article about motorbikes!

You can also use social bookmarking sites such as Digg, delicious etc to point to your articles aswell.

TIP 4 Eza tip 4: Link other articles in your resource box

In your resource box Place a link to your other articles, so you cross promoting your articles within each other. This can be done by placing your signature link to your product page, and also a link to another similar article to do with that. You may notice that people do

Did You Enjoy This Report ?...Then Please Download My Other 9 Reports by [Clicking Here](#)

Please Distribute This Report To Your Website visitors 'or' to your Email list

TIP 5 Eza tip 5: Email your subscribers the link to your article

Send a link to your article to your subscriber list. If you have a good relationship with your list, and contact them regularly send out a broadcast email with a link to your Eza articles, I did this and the article spread virally, some of the list members included the article on their blog, and then it spread more and more virally. This is something not many people do, and you should try it.

TIP 6 Use Youtube Marketing

Unleash the power of Youtube traffic- (Hint Youtube marketing is still in its infancy. I'll show you the 'correct way' to drive thousands of visitors using this popular video sharing site.

A marketing method which is still in its infancy is YouTube Marketing. YouTube Marketing consists of uploaded short recorded videos onto youtube and placing a link in the description to your website.

Although some internet marketers use youtube many do not, and they are missing out. Some people upload videos on youtube for pleasure but they don't realise how much extra traffic they can bring to their websites (or even to a new website if they don't already have one) from their videos. Youtube marketing is similar to marketing on ezine article sites.

TIP 7 Optimise your youtube video titles and descriptions

You have to optimise your title, description and link in a similar way you would to SEO pages of a website, and the best way is to be natural, rather than using fake black hat methods. Be sure to include a link to your site in your description.

TIP 8 Submit your videos to multiple video sites

You should also submit your video to other video sharing sites such as:

buzznet.com

clevver.com

dailymotion.com

Google Video

howcast.com

multiply.com

sevenload.com

veoh

Viddler

Yahoo Video (For more sites, please see my Resource section at the end of this report)

If you make useful videos, they can be passed along virally, so you can benefit from viral traffic. Do Make your videos creative +useful for the viewer. Unleash the power of youtube.

Please Distribute This Report To Your Website visitors 'or' to your Email list

TIP 9 Video Marketing mistake 1 to avoid

Video marketing is great! But here are 3 Mistakes to avoid which can instantly Hurt your marketing efforts, when using video marketing!

Don't make your videos too long or people might get bored and click another video, Keep them 4-5 minutes maximum, and provide some decent content in them. You can even go longer to 6-8 minutes, if you can provide some useful content that you know the targeted visitor can benefit from.

TIP 10 Video Marketing mistake 2 to avoid

Not providing any useful content. There are loads of videos over youtube which just have music playing in the background with a powerpoint slide of a link in the background, and no content provided!, This is the weak video marketing method which might not get you many views to your website. You have to provide content, even if you aren't speaking it into a microphone, but put up some worded content on some slides and have that up. But better than that would be to speak with a microphone and record them tips speaking. Tip: If you don't like your voice, get a family member or friend to help. Teaser videos work good.

TIP 11 Video Marketing mistake 3 to avoid

Not including a link in their video. Some people just don't include a link to their website in their video, but just include it in their Description or title (the tags)- but by leaving your link out of your video you are losing potential visitors! Include it in the video, like a watermark!

TIP 12 Video Marketing mistake 4 to avoid

Not including a call of action! This applies for article marketing, Seo marketing and email marketing, A Call of action would be your typical- to get my free report click here. You have to also include a call of action in your videos too, so that you get your visitors to act! The best is to make a teaser video and asking them If they want any more information then they should click that link to find out more.

TIP 13 Have an affiliate program!

The number 1 thing you must have in your marketing model to grow your traffic exponentially!. If you don't have this, YOU ARE INSANE!

This is for if you are selling info products such as ebooks, membership sites, online courses, physical products and other info products. If you are selling them and better yet own them, then you should have an affiliate program, which will get 'other' people to sell your products for you. This is a risk free marketing method, where you can't lose out on. You need this as if it is done well you can explode the traffic to your sites dramatically. The downside is you have to give a commission of your sales to your affiliates, but it is worth it.

Please Distribute This Report To Your Website visitors 'or' to your Email list

Clickbank is one of the easiest places for affiliates to find your product, so make sure that you have your ebook listed there. Tip – offer maximum conversions – 75%. This will attract more affiliates to your site (and as long as you have a strong copy on your sales page- then there's no reason you shouldn't attract some regular affiliates)

So have an affiliate program, and you can potentially just make money and gain extra traffic from other people's websites. You get traffic, they get commissions! Everybody is happy!

I am sorry to state the obvious, and most marketers will be including affiliate programs, but if you are not then PLEASE USE AN AFFILIATE PROGRAM!

5 ways to increase your squeeze page conversion(Tips 14 to 17)

I have tested these 5

I have tested and tweaked a series of squeeze pages in micro niches, and found that tweaking headlines, subheadings, pictures, colours, fonts etc can have an increase and decrease on your Opt-in.

For newbies:

Opt-in rate = the amount of 'total' visitors who are on your website who actually subscribe to your optin form.

Optin rate = Subscribers /total traffic to that page x 100

Example- my site had 330 visitors today, from which 130 visitors subscribed, and gave their email address. The rest left the site without subscribing.

Opt in rate = $[120/330] \times 100 = 36\%$. I did tests and am going to show you 4 ways in which you can increase this opt in rate even more.

But please do test this for yourself, as my results might vary with yours.

TIP 14 Increasing opt-in Rate- TIP 1: Font Type

Keep your font arial! Best font which increased conversions the most = Arial, size 11. I have tested the common ones, and verdana works good too, but please you must test them.

TIP 15 Increasing opt-in Rate- TIP 2: Background Colour

Best colour used in the background, which increased my opt-in rate the most was navy blue, and white. They both produced very high optin rates

TIP 16 Increasing opt-in Rate- TIP 3: Your Heading

Craft your heading carefully! Headline- This got varied results. The different heading debate can go on for ever, what words to use, what sentences to structure. I found 2 things though.

Please Distribute This Report To Your Website visitors 'or' to your Email list

Firstly Using a number in the heading increased conversions (such as 5 ways, 27 negative thoughts, 52 ways to). However you want to structure it, include a number in your headings-Tip- end each number with 7, as 7 is a proven number to increase conversions (you can use this for the price of your products too)

Secondly you can simply add a word such as Learn, Revealed, Uncovered, Rare etc at the 'start' of your heading. That increased my optins than 'without' using them.

Eg- Learn 6 Tips To *****

Revealed, Marketer Shows How You Can *****

TIP 17 Increasing opt-in Rate- TIP 4: Add a Video

Many people will think this is hassle, but it is well worth the increase of optins- and that is to add a video testimonial, or even a video testimonial. This doesn't have to be long either, even if it is between 2-3 minutes you can see a series increase in your conversion rate. I tested 1 of my pages with and without a video.

Without a video = 28%

With an included video (wording exactly the same) = 49%

I didn't bother too much with the wording element, just wanted test a video, as many people have said for them videos have increased sales. Now you don't have to be In the video, you can just use powerpoint slides with a microphone, using a program like camtasea to produce it. Important- place this video just below the heading for best responses!

TIP 18 Increasing opt-in Rate- TIP 5: Go above the fold

Make sure your opt-in form is above the fold of the page, which will boost your optin rate too!

TIP 19 Social media? waste of time? Or worth it? Let me tell you, straight from my testing campaigns!

I have tested facebook and twitter and only to find that for me this traffic doesnt convert that well into sales. But it isnt all bad news, I have found it a great way to stay in touch with my list, and also to build new lists in other niches. Facebook is the number 1 social bookmarking site at this time, right now

TIP 20 Use a Friend Sharing Script

Here is a clever marketing tool I use to boost my optin rate by 240%.

I'm sure you have heard of tell a friend script. This is basically where you can get your messages by your initial 'first' subscriber to be passed to 3 of their friends. It is a clever way of viral marketing, but very few do it. I use <http://www.freetellafriend.com> which has helped me spread the word about my campaigns and products, in some cases like wildfire. Another benefit is that It's compatible with wordpress blogs. Just think of the potential!

Please Distribute This Report To Your Website visitors 'or' to your Email list

TIP 21 Upload your PDFs to Fileshare sites

If you have some free PDF reports which you are offering your email subscribers as a gift when they optin, you should upload these PDFs to filesharing sites, and torrent sites. I get an average of 20-25 new subscribers from traffic just from torrent sites. I do this by uploading my traffic to filesharing sites and torrent sites. If your bonus ebook has valuable content it can also be passed around, and then can spread virally. How great is that? If you don't have any ebooks, just create some short ones and get distributing. This is an untapped goldmine for receiving traffic and you can gain some major exposure!

TIP 22 How to attract JV partners

Here is a show you a powerful method to approaching JV partners that can automatically get them to say yes to your proposal.

I call this the chasing up method, as you might have to email them continuously, where you find some of their content which you find valuable (such as a video or an article) and you link to it on your blog and comment about it in a review style post, where you are saying that you find their content powerful and beneficial to you and your visitors.

When you email them, you then send them an email stating is it ok to use their content as a reference on your blog. They will like this (the fact that you are complimenting it) and will give the go ahead. From here you do it 3-5 more times spacing it out, and then the relationship builds from here.

Note- You are NOT adding their content/video to your site but just commenting on it, linking to it. As if you add their content to your blog they might not allow it. Just link to it, and comment/review about it, Then email them stating that you have done that. I have done this many times and got some solid JV partners using this method! Use it!

TIP 23 'Naughty words' can actually increase your responses

Using naughty words in headlines can sometimes increase your conversions and responses. I'll give you examples of headings I used, and the responses they have got!

I have tested many different headlines, and have found using the word **Sexy, sensational, bloody, stupid!, idiot** and also **b*stard** (if you are under 18 please and read that, then please understand that this is just marketing!)

Examples

Get A Sexy Pair of Teeth Using These Basic Methods (teeth whitening micro niche)

Is That Stupid Teacher Causing Your Child To Fail? Then View These Home Study Tips (bad teaching- bad results micro) – although the heading might be harsh, it increased opt-ins lol.

Is That B*stard Ex Still Chasing You? Click Here to make him suffer (cheating ex niche)

Did You Enjoy This Report ?...Then Please Download My Other 9 Reports by [Clicking Here](#)

Please Distribute This Report To Your Website visitors 'or' to your Email list

Using them words in certain positions in my headlines have actually increased conversion rates on my products, and also made my opt-in rate shoot up too!

Don't be shy to be harsh or use harsh words!

You have to be aggressive in internet marketing

TIP 24 Test your headlines

You can get some testing scripts which split test your headlines for the conversions. This will test webpage A against Webpage B to see which one performs better. You can then choose the winning webpage, and reject the other one. You should test your headlines, your titles, your descriptions, your page background colours etc. *Check the resource section for my recommendations.*

TIP 25 Productivity tip

I have found when listening to music this helps with my productivity working.

Now... I don't mean any music, no rock, no pop, no garage, no jungle, no hiphop (although they are good in the background) but soothing calm yoga like music, at a low volume...in the background (realplayer) - on Loop.

I find this at a low volume repeated soothes me and increase my brain to work calmer, so I work more effectively

I am not even sure if many people even do this?

TIP 26 Make sure that you Over deliver!

This next tips is about all of your content that you produce and put out on the internet. When ever you produce it, you should make sure that you over deliver! This will in the long term pull you in more traffic.

Your content can include

- Articles,
- Blog posts,
- Videos,
- mp3s,
- PDF reports etc

This is all about providing more than what your prospect actually wants. spending the extra time, effort, and money to do this in the 'preparation' stage, you will earn more traffic, more trusted customers and money in the long term.

When selling an ebook make sure that the content is not Average but infact EXTRA HOT, and give the customer more than they bargained for!

Please Distribute This Report To Your Website visitors 'or' to your Email list

If you sell a \$27 product, provide content in it as if it was worth a \$97 product.

This will gain your customers more trust than if you just give them an 'average' product.... and they will be Much more attracted to buying a future product from you (if they are on your email list)..as a subscriber. This will in the long term pull you in more traffic.

When you over deliver, you will win your customers heart More, and earn their respect, than if you provide a crappy 'average' product.

It is also good to be unique, sometimes different and original. All it means is you have to put more effort at the product creation stage, but does it matter? wouldn't you get more respect/trust and MONEY from your customers in the long term? So make sure that you do this on every part of your marketing funnel.

The More you put into something, the more you get out!

This applies for your Blog post content, your articles, even your Forum Answers -hence this one...

TIP 27 Use a Logo

Have a logo for your brand and site. If you cannot do graphics, outsource somebody to do so, but it is important and looks more professional to use one. Some graphic designers are very creative too, so make sure you tap into their skills. I have found people from Romania are good designers at low prices, so have a try, but be sure to see their past work too.

TIP 28 Use Forums

Become an active member in some similar related forums. This can be done by writing quality posts and writing quality replies. It is more about quality of posts, not quantity. 20 Brilliantly written posts, with excellent content is better than 90 poor posts. Make sure you also don't break the forum rules, and don't just spam your signature link. Many people don't realise that forums are great places to find other people who have websites in similar niches to what you are in.

TIP 29 Search forums for possible JV partners

Forums are a hidden place to find some potential JV partners. So make sure you make friends when posting on them, and find out if any of these forum members have any other websites similar to yours. Some might even have lists! So do use this to your advantage. Don't just start multi emailing forum users with JV requests, as this will most likely get you no response, but you have to build a trusting relationship with the people first. This can lead to a further JV proposition, and if you are lucky they might even approach you instead.

Please Distribute This Report To Your Website visitors 'or' to your Email list

10 Completely Free traffic methods. Yes, YOU DON'T have to pay for these

- 1. Commenting on popular blogs-** Especiallay the high authority ones
- 2. Linking from other authority sites, to your site.** This can build your linking power and increase your rankings
- 3. Social bookmarking-** If you bookmark your site, it is exposed more so others have more of a chance to find it
- 4. Submit your RSS feed to Rss directories.** This again exposes your blog to more and more eyes and visitors
- 5. Forum posting: Post in forums,** but make sure you dont write spammy posts, but useful high content posts.
- 6. Submit articles to article directories.** This is a good way to get traffic long term.
- 7. LinkedIn.** This is basically the facebook of the employment world. You can meet Jv partners on this, and get more exposure for your business/site
- 8. Blog carnivals-** These are an excellent way to find other bloggers in your same niche, and to blend in with other players in your niche. It is creative too.
- 9. Adding SHARE this buttons on your blog or site,** such as Share this social bookmark buttons. This gives your visitors the easy option to press a button and share your contnent. You better make sure your content is good.
- 10. Write short reports and submit to Ebook directories.** This is an old tequnice but can get your ebooks distributed virally.

TIP 30 Add viral share this buttons to your blog

These days there are hundreds, no actually thousands of wordpress blog plugins and themes. You should install the social bookmark sharing plugins, especially the twitter, Digg and facebook ones. This will give you more of a change of your content being shared. Wouldn't you like your blog posts to be shared automatically by just installing a few plugins? Be careful not to overdo the amount of plugins you add to your blogs as this can have a negative slowing down affect on your blog loading.

Please Distribute This Report To Your Website visitors 'or' to your Email list

TIP 31 Use Yahoo answers to get extra traffic

Many people still don't realise that yahoo answers provide a good way to generate some traffic and links to your site. But people end up doing it wrong. My tips for yahoo answers are:

- post on questions relating to your niches, (don't post a link to a golf site on a pet related question),
- solve people's problems on with your yahoo answers,
- Be the first to post- I find this generates a lot of views, so try and make sure you are the first person to post when you answer somebody's question.
- You can also ask any question which you know will generate a lot of curiosity and interest for others.

TIP 32 Include your Site URL name on your emails

Include your website on your autoresponder series emails. Some people forget to do this I have seen, and it can cause a negative affect on your subscribers as many can unsubscribe. You have to keep reminding them who you are, and what your site is. I receive many emails and I don't even remember where they came from and there is no reminder or no URL in their email, so I end up unsubscribing to them. Do you want this to happen? Then include your URL.

TIP 33 Create a custom 404-error page for your website.

People lost traffic by people accidentally going to a wrong link in your domain, so get directed to a 404 error page. You can tweak or change this page and offer a link on it, or even a click to a product you are promoting. This will make sure you recycle any visitors to your website. There is nothing worse than wasting a bunch of visitors when you can profit from this waste.

TIP 34 Comment on other peoples blogs

Make sure you follow other popular blogs in your market, and be a guest commenter, with a link to your site on the blog. Make sure your posts are useful and not just a blatant link to your site. If you become a regular commenter then the blog owner might recognise this and consider you for a JV partner at a future date, so keep posting him useful comments, saying that you appreciate his blog.

TIP 35 Don't multitask too much

You can get exited by thinking you have started 5 days in 1 day, and just completed 20% of each in that day but you have to realise that this can have a negative affect on your productivity, as the work gets produced out at a slower pace. This can vary as some people I know can work faster with 2 tasks done a day, completing each one a half by a half, but I think many get one task at a time done faster.

Please Distribute This Report To Your Website visitors 'or' to your Email list

TIP 36 Use press releases

Press releases are a way of getting some backlinks from authority sites to your webpage, and if done well you can gain a great buzz. Be aware though, there are many press release sites out there, and loads of smaller ones. Try to aim for the larger ones, although some do charge per submission. Make sure when you write the press release you don't make it too salesy and write it in the form of a news release. What might be better would be to pay a writer to write it for you but make sure that you see their past work before.

TIP 37 Upload photos on your site

This will make sure they are picked up on google images. Upload your images on Flickr and Buzznet, which are two photosharing communities. You can tap into a resource of traffic using this tip. Technorati can also pick up these pages on their tag pages. Images are good to show transparency in your business, rather than being a hidden product owner.

TIP 38 Create some business cards

Try using offline marketing methods, and what better than the common old business card. These can be placed in places where your niche customers hang out. Eg if you are selling a Baby ebook, you can place some in some baby shop customer service desks (with permission of course).

If you are selling in the Tennis niche (a tennis ebook), you can ask the manager of a sport centre to place these cards in their sport centre,

TIP 39 Write a Free Ebook

Write a 'How to' or a '10 steps to' guide ebook in your niche, and these usually can be created in niches where you are solving problems. If you can't write it, hire somebody to write it.

You will build trust and authority if you provide a great report, and will get more attention from readers.

TIP 40 Use banner ads

You might have to pay a graphics flash guy but they can do some awesome designs for you, which might cost but if you have the right placement of this ad, you get some great results. Find a partner who has a similar niche site to yours, and email them asking if you can place your banner on their site. You should have a bit of a vision for what type of banner designs you want and tell this design to your designer. Make sure you see their past work too.

Please Distribute This Report To Your Website visitors 'or' to your Email list

TIP 41 Print T-shirts with your website on

This is such a cool way to visually and physically see your website, and you can even wear a shirt when you work away on your computer. But make sure you give them out to friends and family. Wouldn't you like to own a tshirt with your website logo on, or with your URL across it? Better than owning it you can wear it and feel proud of your creation. You can do the same with mugs.

TIP 42 Tell your friends about your site

Tell your friends and families, including your work colleagues about your website, so that it spreads the word. Some might not want to let their family finding out that they are doing internet marketing but it is always a good suggestion to considerer sharing the word. If many people get confused about what you do or what your site is about then just explain to them in simple terms, without any complicated terminology

TIP 43 Email your Hotmail/yahoo/Gmail Contact Email list your website

I'm sure most of you have used yahoo email, or hotmail, or Gmail or even AOL mail for a while now. You will usually have a contact list of peoples email addresses to whom you have sent emails too. You can send them an email promoting your site, that it is up and running, and that more people are aware about it. You can even get them to forward your site to other people.

TIP 44 zine articles to find

Write a Press release, or ghost hire a press release. You will then have to submit this press release out to press release sites to get the word out. This can be a good way of getting exposure but you have to make sure you don't write it in too much of a salesy pitch.

Write or get someone to write a press release and submit it to press release sites, like www.PRWeb.com.

TIP 45 Encourage your readers to Digg your content

Instruct your readers to Digg your videos, your articles, blog posts, etc. Digg is a good social bookmarking site that can get you a lot of votes to your content from other people. For your blog, you will need to include your Digg button on your blog as a plugin. If your blogging audience is familiar will digg, then they can dig your posts using your dig button, especially if they are familiar with dig. But you can always ask them to Digg your post.

TIP 46 Write content for humans, and not for a robot

Many people used to write in terms of the google bots, and stuffed their articles and blog posts with the Keywords that they were targeting. This doesn't seem to work very well

Please Distribute This Report To Your Website visitors 'or' to your Email list

these days, and the SEO spiders are more clever these days, and can work out if your content has been stuffed with content or not. Nowadays you should write all of your content for the eyes of a human being, so that it is easy for them to read, and they understand it. Keywords should be kept to a minimum.

TIP 47 Create a blog plugin, a widget or a WP Blog theme

These things can be submitted to directories, or software sites such as download.com, and these things can get passed around virally. If you have no programming knowledge, then you can always hire somebody from Elance to program your widget or plugin for you. Tip – make sure your plugin has some actual use, rather than creating a piece of code which is a waste of space.

Thats the end of my 47 Tips...

But wait...Im giving you 5 Extra Bonus tips

Yes, Im feeling that Generous!

Bonus TIP 48 Target popular niches

Target niches which are firstly solving a problem, and secondly are working well for others. It is proven that the weight loss niche works, although is saturated, but there's nothing to stop you putting up some blogs about weight loss and promoting weight loss products, and then on the site build a list, and promoting other offers to them. By niches which solve problems I mean this- the weight loss niches solves the problem of losing weight, the relationship niche solves the niche of saving the relationship, the debt niche solves the problem of getting out of debt.

Bonus TIP 49 Put affiliate links in your ebook

This will make sure that you get more profits instead of just traffic along from the distribution for your ebooks. If this is done right you can get a real viral ebook spread like a virus, and not only will your traffic increase but your profits too, as long as you place the affiliates in carefully. The trick is to insert them after some content..and NOT TO just hard sell to the reader.

Bonus TIP 50 Create your own product

It is a good way to earn revenue using adsense and affiliate programs, to promote other peoples ebooks, products etc but a more solid long term strategy is to create your own product, yet many people do not.

I can give you another report on Product creation tips if you want, but only if I get a lot of demand for this report, and trust me the advice and tips are hot!

Did You Enjoy This Report ?...Then Please Download My Other 9 Reports by [Clicking Here](#)

Please Distribute This Report To Your Website visitors 'or' to your Email list

Bonus TIP 51 Purchase links form High page rank sites

One proven strategy in Search Engine Optimisation is to build some backlinks, and a solid way to build some backlinks is to get some from some high Page rank sites or blogs. You can purchase these from websites which sell links for you to purchase, and one I recommend is

<http://www.textlinkbrokers.com/>

<http://www.text-link-ads.com/>

Bonus TIP 52 Keep adding content regularly

The internet is all about content, and the more you have out there, the more change somebody will have in stumbling along to one of your pages. Keep adding content to your blog, keep adding pages to your domain, keep adding videos to your video sites etc.

My Final Rant – Make sure all of your content provides Excellent information, not just some dull rehashed information, but some hot info that the reader can use and benefit from. Try to Over deliver in every instant!

Well, that's it for now! But there is plenty more of these types of reports. Just subscribe to optin for the latest special reports you can [download for Free Here](#)

That's all for the tips, See the Resource Secion below though...

Did you enjoy this ebook? Then Please drop me a Message on [My Blog!](#)

Do you want to JV with me? – don't be shy, drop me a message on [My Blog!](#)

Not done a JV Before? - Don't panic, You can do your first one with me.

Oh and Before you read the resource section...there is a deliberate mistake In this ebook, which I have made on purpose. Only if you are sharp and alert will you be able to notice it. What was this mistake? Drop a comment on [My Blog](#)

IMPORTANT: *Free Free to share this report with your website visitors, subscribers, friends, blog visitors....email it to your lists, Share this with Facebook + your twitter followers etc.*
